

# Small Research Projects in Gravitation & Cosmology

We are offering several **small research projects** on an undergraduate as well as graduate level. These projects will give students an opportunity to develop their **own research skills** and will lead to a familiarization with current research topics in the realm of **gravitation** and **cosmology**. The projects will cover manageable subject areas and are intended to be carried out on a largely independent basis.

Students with interest in these topics are also encouraged to attend the short **introductory series of lectures on General Relativity and Cosmology (1-10 December)** which will be part of this semester's Astrophysics 405/505 course (MWF 3:10-4:00, Physics Hall 43, Cr. 3)

Please contact **Dirk Puetzfeld** (office A419 , email [dpuetz@iastate.edu](mailto:dpuetz@iastate.edu), phone 292-5062) for further details.
